Forecasted Weather Delays

Visit [RainBird.com/RC2](https://RainBird.com/RC2) to learn more about everything built-in!

The **Rain Bird RC2 Controller** is the perfect solution to add reliable, flexible irrigation performance for contractors and homeowners.

With WiFi Connectivity, the RC2 offers a long list of features that make everything from installation to daily use easier. Even troubleshooting problems and service calls are more efficient.

With over 80 years of experience we know how to make irrigation systems work seamlessly. The RC2 is another example of that and its backed with a 3 year trade warranty.

## Easy to set-up

Quick Pair Technology securely pairs controllers to your phone or tablet with a fast, secure connection.

## Save Time and Water

Real-time weather data is sent to the controller and then automatically adjusts schedules to avoid over watering.

- Water Sense Certified to meet stringent water restrictions.
- Saving up to 50% in water usage.

## Simple To Install

The Wireless Access Point is great for job sites without WiFi access to finish setting programs.

## Advanced Features

Advanced automations make it simple to delay or resume schedules to keep working worry-free.

- Seasonal adjust by program to easily increase or decrease watering.
- Avoid run-off with Cycle and Soak by station.

## Fast Configuration

Schedule Templates quickly load commonly used programs instead manually setting them.

## Remote Access

With our app, intuitively access all controller features from anywhere. Making it easy to adjust programs or troubleshoot problems.

- Water a single zone, all zones, or set a schedule.
- 3 available programs with up to 4 start times.
- Set notifications for weather-based events.
