Rain Bird® IQ™ Central Control System

NEW

We are proud to announce the release of our IQ™ Central Control System. This easy-to-install, simple-to-use system allows contactors, public agencies, and water managers to monitor and control irrigation at multiple remote sites from a single computer. The operator can do anything they could do standing at the controller from the computer in their office without having to travel to the site.

Utilising Rain Bird's popular ESP-LX Modular Controller and easy-to-learn software, IQ provides cost-effective irrigation control for residential/light commercial site applications. A wide variety of wired or wireless communication options provide connections between the computer and the individual site controllers. The system provides a basic set of water management features including ET/Seasonal Adjust and Cycle+Soak™ to save water, money and time.

The next-generation IQ hardware and software platform was developed by the Rain Bird Controls Division at the San Diego Ridgehaven facility. The initial product release was in English and the International language version is being developed for release later this year. Future IQ system development is planned to expand the platform for larger commercial site applications.

Rain Bird developed the world's first computerised central control system in the 1970's and today has thousands of systems installed worldwide. IQ joins the Commercial Division central control product family which includes Maxicom²®, SiteControl and MDC. IQ is another example of Rain Bird's commitment to The Intelligent use of Water™.

At Rain Bird, we believe it is our responsibility to develop products and technologies that use water efficiently. Our commitment also extends to education, training and services for our industry and our communities.

The need to conserve water has never been greater. We want to do even more, and with your help, we can. Visit www.rainbird.com for more information about The Intelligent Use of Water.™

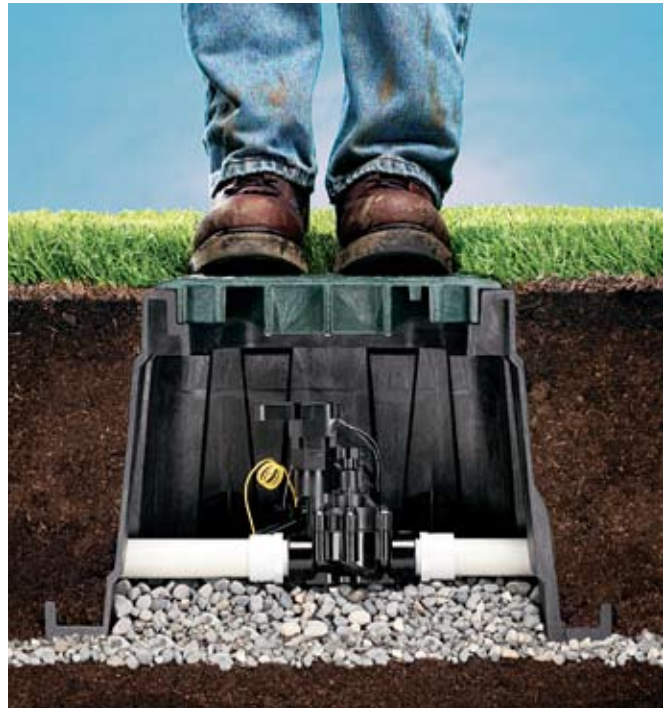

Stand on Firm Ground with Rain Bird Family of Valves

Healthy landscapes depend on the reliability of the valves you install. Rain Bird's family of valves offers solid performance, no matter what kind of job you're up against. With our industry leading designs and innovative features, you're guaranteed long valve life—not to mention the lushest lawns and landscapes around.

Rain Bird's complete line of plastic valves, like the DV and ASVF valves give you an economical, reliable valve for residential to light commercial applications. Our industrial-strength glass-filled nylon valves, like the PEB series offers our most durable plastic irrigation valve for commercial applications.

Our brass valves are made for heavy duty commercial applications with additional features that ensure the valves provide you with efficient, trouble-free performance under harsh conditions. The BPES model is equipped with a patented scrubber mechanism to actively fight dirt and particles and also feature a unique combination construction of brass body and glass-filled nylon bonnet. These valves are designed to withstand extreme pressure surges, effluent water and clogging debris.

Don't risk your reputation on valves that could crumble underfoot. Go with the sure thing and you'll see why most specifiers and contractors prefer Rain Bird valves.

For unsurpassed performance, brass valves withstand the toughest applications and the worst conditions you'll face.

Ranging from plastic to industrial-strength glass-filled nylon, Rain Bird offers reliable valves for a variety of applications.

GB Series

Quick Coupling Valves

DV Series and DVF Series

ASVF Series

Rain Bird Allied Products

Rain Bird International Allied Products provide the highest quality solvent cements and primers in the market. Products are available for immediate dispatch, including hazmat packaging options for air freight shipments.

Medium, heavy & extra heavy bodied cements are available to accommodate most climatic concerns and pressure duties up to 76cm diameter pipe and fittings. It can't go without saying we encourage the use of primers to facilitate better bonding. A complete line of priming products is available, as well as a selection of jointing product accessories to make installations easier, such as brush applicators, daubers, epoxy cans and knee pads.

Solvent Cements And Primers

Technical Specifications outlining correct solvent and primer selection are available from your local Rain Bird representative.

and is recommended for ALL grades and types of PVC pipe and fittings, potable water, pressure pipe, gas and conduits.

Medium 'Hot' Blue Cement

Very fast setting medium-bodied cement formulated for wet conditions and/or quick pressurization and fast installation. Recommended for ALL grades and types of PVC pipe and fittings up to 15cm diameter, potable water, pressure pipe, gas and conduit.

Extra Heavy Bodied Gray Cement

Medium setting grey coloured cement for use on PVC pipe and fittings up to 76cm diameter. Builds up for large diameter installations and fills gaps in large diameter pipe and loose fitting joints.

Heavy Duty Gray Cement

Heavy bodied cement for use on PVC pipe and fittings up to 30cm diameter. Thick formula fills gaps in large diameter pipe and fittings

Purple Primer

Purple tinted aggressive primer/cleaner for PVC pipe and fittings removes surface dirt, grease and grime as well as softens pipe to allow a fast, secure solvent weld.

PROFILE

Profile:

Bear Mountain Resort is truly like no other, situated on 1,100 acres near Victoria, Canada, the land has become a world class golf resort community, which includes:

- Westin Bear Mountain Victoria Golf Resort & Spa
- Hundreds of apartments and town houses
- 2500 - 3200 single detached homes in 18 - 24 phases
- Retail space and community/recreation centres
- Convention area
- Restaurants
- Jack and Steve Nicklaus designed Mountain golf course
- Second 18 hole course will open in 2008
- 65% of the property dedicated to open space, gardens, park land and an extensive trail system

Bear Mountain Resort

Victoria, British Columbia, Canada

Project:

With a project that includes miles of irrigated medians, acres of irrigated parks, gardens and common areas, Rain Bird products were chosen because of their quality and consistent performance.

Rain Bird Product used:

- Hundreds of ESP-4M, ESP-LX and ESP-6TM Controllers
- Tens of thousands of 1800 SAM PRS Sprays
- Thousands of 5004 Rotors
- Thousands of 100DVs, PGAs, PEBs and 300BPEs
- Extensive use of Rain Bird Landscape Drip products
- Full line of Rain Bird Golf products
- ET Manager™ to be installed by Spring 2007

People Involved:

Contractors who installed Rain Bird products, include BM Landscaping, Aubrey's Irrigation, and Halls Irrigation, a Rain Bird Select Contractor®.

Use Rain Bird Rotors to Help Stop Damage in Public Areas

Ideal for athletic fields, schools, parks or any public space, Rain Bird® 5505, 5512, 7005 and 8005 rotors are built to withstand the harsh conditions and vandalism often associated with commercial applications.

With non-reversing full- and part-circle operation in one head, you only need to buy one model. All four of these rotors use the same adjustment, so you'll be familiar with the adjustment whether you are using the 34" 5505 and 5512 rotors or the 1" 7005 and 8005 rotors.

Check out these anti-vandal features:

- A brass reinforcement shaft connects the turret to the riser making the rotor resistant to damage from side impacts.
- Memory Arc® returns the rotor to its original arc pattern if it is twisted out of adjustment ensuring water will always go where it's supposed to.
- Non-strippable drive mechanism ensures the rotor will rotate, even when it has been tampered with repeatedly.

Nozzles Made Easy

As with all Rain Bird rotors, the 5505, 5512, 7005 and 8005 rotors come with a full set of nozzles engineered with Rain Curtain™ Nozzle Technology. This technology delivers efficient, close-in watering, large wind resistant water droplets and even water distribution across the entire radius to assure superior green grass results.

To save time, nozzles can be ordered pre-installed by the factory or, if you prefer, ordered at the time of your rotor purchase. Either way, there is no additional charge.

Rain Bird® Academy - Australia

Professional Irrigation Training Camp 2007

Join experts from around the world for one of the most respected and comprehensive training experiences in the irrigation industry. This diverse program offers a variety of classes important to irrigation professionals. Receive instruction from irrigation industry certified trainers on various topics ranging from field installation techniques and troubleshooting to general product knowledge.

DETAILS

Golf Course Supervisors

- Learn how to get full use of the features of your central control.

Irrigation Contractors

- Save time in the field by learning expert troubleshooting tips.

Contractors and Dealers

- Learn business techniques specific to the irrigation industry.

Turf Site Supervisors

- Learn how to get full use of the features of your central control.
