Poly-Pipe Saddle Tee. NEW Just Strap It and Tap It.

The Rain Bird Saddle Tee is the newest product designed to make your life easier.

Quick Connection

Wrap and lock the heavy gauge ratcheting saddle around the pipe, then turn the piercing cap all the way down to its locked position. The saddle tee makes a rock solid connection for spray heads anywhere along the line.

Durable, worry-free design

Positive locking saddle strap and cap won't loosen or leak and seals tighter with water pressure. Nearly indestructible design and materials, so you don't have to worry about callbacks.

Better Flow

When cap is locked, flow ports automatically align with flow direction. Flow port shape and automatic alignment maximize available pressure for enhanced irrigation performance.

Part No.	Description	Per Case	Wt. Per Case
A11245	1/2" (12.7 mm) Piercing Cap and Saddle	75	5.9 lbs. (2.68 Kg)
A11250	3/4" (19.0 mm) Piercing Cap and Saddle	75	5.9 lbs. (2.68 Kg)

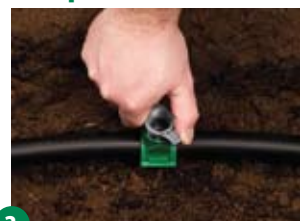

Strap It

1

Wrap the ratchet locking saddle around pipe and tighten securely

Tap It

2

Twist Cap to pierce poly pipe – no tools or fasteners required.

Lock It

3

Lock the cap in line with flow.

At Rain Bird, we believe it is our responsibility to develop products and technologies that use water efficiently. Our commitment also extends to education, training and services for our industry and our communities.

The need to conserve water has never been greater. We want to do even more, and with your help, we can. Visit www.rainbird.com for more information about The Intelligent Use of Water.™

Rain Bird Maxi Wire Decoder Cable Keeps Installation On Track NEW

Rain Bird International Inc. is pleased to announce the release of Maxi Wire. Our new decoder cable has been specifically designed for use in Rain Bird two wire automatic control systems.

Rain Bird Maxi Wire has an industry-first five (5) year warranty, together with several unique features such as,

- Sequential feet marking on the cable - to allow the installer to keep track of remaining wire on the spool.
- New reel construction makes for easier shipping, handling and installation. Made from 100% recyclable Low Density Polyethylene (L.D.P.E.) our spool construction makes a supremely durable product that will withstand the rigors of installation like no other. Shipping-friendly dimensions and our unique interlocking reel design ensure your product arrives in the same condition it left the factory.
- Available in 14/2 and 12/2 diameters and a variety of colors.

Rain Bird Maxi Wire is designed to operate valve decoders. The wire is constructed with tin coated copper conductors, insulated with PVC and has a high density direct burial jacket. Conductors are UL approved Type UF.

Contact your Rain Bird Area Manager, or email us at alliedproducts@rainbird.com for more information.

The Best Selling ½" Rotor on the Market Just Got Even Better

The Rain Bird® 3504 Rotor now comes standard with a rubber cover and self-flushing arc adjustment screw.

With superior debris resistance, the 3504 is your best choice when selecting a short radius rotor

- New Rubber cover and self-flushing arc adjustment screw for superior debris resistance
- Rain Curtain™ nozzles ensure even distribution of water. • Three-year trade warranty
- True 4" (10.2 cm) pop-up height (measured from the cover to the nozzle). • Optional Seal-A-Matic™ (SAM™) check valve available
- Optional non-potable cover for easy identification of reclaimed water.

All of this, at an affordable price makes the 3500 Series one rotor that is easy to use, easy to buy and tough to beat!

The Intelligent Use of Water Initiatives at Rain Bird

Rain Bird recently launched several new initiatives surrounding our corporate philosophy, The Intelligent Use of Water™. Check out www.rainbird.com/iuow to learn more about our water conserving efforts within and outside the irrigation community.

New Advertising Campaign

Designed around the four cornerstones of The Intelligent Use of Water - Leadership, Education, Partnership and Products, these advertisements highlight the initiatives Rain Bird actively promotes.

Leadership – Rain Bird has sponsored six international summits, bringing together some of the world's leading experts on water, irrigation and conservation to openly discuss and debate important issues. You can read more about the IUOW Summit on www.rainbird.com/iuow

Education – Rain Bird published two whitepapers, "Irrigation for a Growing World" and "A Homeowner's Guide to Water-Efficient Landscaping" California State Polytechnic University, Pomona (Cal Poly Pomona) to develop the Explorations into Water Teaching Curriculum and the Rain Forest Teaching Curriculum to help teachers and students better understand water's vital role in nurturing and sustaining ecosystems.

Partnerships - Recognizing that there is power in numbers, Rain Bird partners with thought leaders, organizations and governmental agencies to achieve meaningful results. Rain Bird partners with organizations like the U.S. Green Building Council and its Leadership in Energy and Environmental Design (LEED®) initiative to advance The Intelligent Use of Water. From industry related activities with the Irrigation Association to our inclusion in the development of the Environmental Protection Agency's new WaterSense labeling program, Rain Bird demonstrates that no one can do it alone.

Products - Rain Bird's products exemplify the state-of-the-art in water conserving irrigation technology. From features like pressure regulating stems on spray heads and the industry's most efficient nozzles to cutting edge technology like our new ET Manager, Rain Bird's products save water. Every new product or service developed at Rain Bird is assessed for its contribution to The Intelligent Use of Water before it is justified for development or acquisition.

Water Conservation Tips (I-Tips)

Sign up for Rain Bird's I-Tips, a bi-weekly email service delivering you or your customers useful irrigation tips to help maximize the efficient use of water and minimize water waste. Go to www.rainbird.com/iuow and sign up today.

The Intelligent Use of Water Award

Rain Bird's Intelligent Use of Water Award recognizes those persons or organizations whose innovation, leadership, ingenuity and overall commitment to improved landscape water efficiency has raised the standard for landscape water conservation. Nominations for the 2007 Intelligent Use of Water Award closed on September 1, 2007, and an independent panel of experts will select one top winner.

Marketing and Educational Literature Now Available Through Rain Bird International

Enhance your professionalism by using these sales tools when presenting your services or recommending products to customers. A variety of materials are available to help educate customers about irrigation basics, benefits of an automatic sprinkler system, performance and quality of specific Rain Bird products, and more. To order, contact your local authorized distributor, or send an email request to RBInewsletter@RainBird.com

Rain Bird's Maxicom² Central Control System wins Smart Approved WaterMark

The Rain Bird Maxicom² Irrigation Central Control System has long been a favourite with those responsible for the irrigation of large areas with multiple watering sites.

Packed with features such as multiple scheduling, weather monitoring, automatic and manual control options, flow management and Cycle+Soak™, Maxicom² is ideal for large commercial and industrial applications such as those managed by local councils, sporting clubs, retirement villages and park and recreation departments.

Now available in version 3.5 with the additional features of Low Flow Alarm and Odd/Even Scheduling, Maxicom² is among the world's most sophisticated yet easy-to-operate multi-point irrigation control systems.

And it's one of the most water efficient systems too.

Fulfilling every requirement of Rain Bird's Intelligent Use Of Water™ core value, Maxicom² makes the very best use of every drop of water available while ensuring that lawns, parks and reserves receive an adequate water supply.

Little wonder then that the Rain Bird Maxicom² Irrigation Central Control System received the prestigious Smart Approved WaterMark Award from an expert panel of judges on September 4, 2007. It is the only Central Control System that has been awarded the Smart Approved WaterMark certification in Australia.

Intelligent and Smart Approved. That's Maxicom² from Rain Bird. For further information on this award-winning product, visit <http://www.rainbird.com/landscape/products/central/maxicom.htm>
