

LF1200™ Acme Adapters

Rain Bird's LF1200 Sprinklers fitted with Acme Adapters provide the easiest sprinkler serviceability ever because:

- The Acme Threaded Sprinkler (male) is easy to guide into the Acme Adapter (female), even under water pressure.
- Arrows on the sprinkler body and the Acme Adapters allow for easy thread start and quick installation while the system is operating.
- The Acme orifice creates a clean, straight stream that results in less spray when removing and installing the unit.
- The LF1200 drive unit is easily removed from the LF1200 body by lightly squeezing the body with one hand and removing the drive unit with the other.
- The LF1200 is precision molded to be smooth. It does not have sharp edges or points that can be harmful upon installation or removal.

Rain Bird's Acme x Male NPT Adapter...

- > is ideal for retrofit applications where the grower can attach it to the existing NPT riser fitting.
- > is engineered from Acetal to provide maximum strength, impact resistance and durability, year after year.

Rain Bird's Acme x 1/2" Female Slip Adapter...

- > is designed to eliminate an extra fitting on the riser for new installations.
- > is made of PVC for the purpose of gluing it directly to the riser.
- > has dual fitting features – it fits both 1/2 inch and 25mm riser pipe.

Anti-Theft screws for the LF1200 Body are also available. Contact Rain Bird's Customer Service for more information.

Item		Part #
1	LF, ACME Body	118311
2	LF, Adapter, ACMExMNPT	118292
3	LF, Adapter, ACMEx1/2x25mm-slip	118293
Additional Part Numbers		
	LF, ACME O-Ring	118309
	Assembled ACME Units (xx = deflector & yy = nozzle size)	A85003Bxxyy
