

## ESP-TM Controller

**RAIN BIRD®**

*Rain Bird® ESP-TM Controllers are simple to program, making it easy to monitor and adjust watering schedules based on your landscape's diverse watering needs.*

### Application:

The ESP-TM is an indoor controller that has 4, 6 or 8 stations and has two independent programs.

### Outstanding Results:

- Dual programs give you the flexibility to easily accommodate the diverse watering needs of different plants and those areas of your lawn and garden that get more sun or shade, saving you water and money.
- Each program can have multiple start times, allowing you the flexibility to run programs several times a day for shorter lengths of time, helping you maintain a healthier lawn and garden.
- The water budget feature allows you to easily increase or decrease watering schedules without re-programming, so you don't have to waste time at the controller.
- Built in 5-year lithium battery keeps time, date and watering schedules intact during power outages, so relax and enjoy your landscape, worry-free.
