- Indoor and outdoor units available

Contact your Rain Bird dealer for pricing and a demonstration.

Rain Bird Quality. We put Rain Bird's high-quality components, 50 years of controller design experience and extensive testing into the design of this controller.

Quick Installation and Setup. Mounting the controller requires only 2 screws; features like Contractor Rapid Programming™ and copy previous zone make the ESP-RZX one of the fastest controllers to mount and program.

Flexible Zone Programming. Each zone is independently programmed; 6 user-defined start times and flexible watering day options per zone assures you meet mandated water restrictions.

Advanced Features at an Entry-level Price. Contractor Default™, Weather Sensor bypass, and integrated diagnostics are features perfected in Rain Bird's commercial controller line and are now offered in the ESP-RZX controller.
