

# San Francisco Bay Area Signal

# Rain Bird® ET Manager™ Weather Reach™ Signal Information

Irrisoft, Inc. broadcasts a wireless weather signal used by ET Managers to automatically control watering schedules. The information on this sheet contains essential settings that need to be programmed in the ET Manager for proper operation:

**Signal Provider Code** - The code consists of 10 numbers labeled A through J.

**Weather Region** - The Weather Region number represents a weather station. Choose a weather region that corresponds to the weather station closest to the location of the ET Manager.

**Elevation** - The ET Manager uses elevation to calculate ET. The weather station elevation is provided as a reference. ET Manager location elevation must be programmed to calculate ET.

**Historical ET** - The ET Manager uses average daily ET for each month only as a back up to real-time ET. The Average Daily Historical ET values are provided as a reference.
