

A Weather Reach Signal Provider (WRSP) broadcasts a wireless weather signal used by ET Managers to automatically control the frequency of watering. The information on this sheet, provided by the WRSP, contains essential settings that need to be programmed in the ET Manager for proper operation:

**Signal Provider Code** - The code consists of 10 numbers labeled A through J. The code is unique to each WRSP.

**Weather Region** - The Weather Region number represents a weather station managed by the Weather Reach Signal Provider. Choose a weather region that corresponds to the weather station closest to the location of the ET Manager.

**Elevation** - The ET Manager uses elevation to calculate ET. The weather station elevation is provided as a reference. ET Manager location elevation must be programmed to calculate ET.

**Historical ET** - The ET Manager uses average daily ET for each month only as a back up to real-time ET. The Average Daily Historical ET values are provided as a reference.

**Phone:** 321-624-2877  
**Address:** 2611 Brookshire Court  
Kissimmee, FL 34746

Signal Provider Code		
A: 64	D: 95	G: 123
B: 254	E: 11	H: 10
C: 89	F: 236	I: 126
		J: 245

The Water Saver offers Weather Reach Signal Service on an annual subscription. After installing the ET Manager and programming The Water Saver Signal Provider code, complete the Weather Signal test described in the Installation Guide. The Attention light will be on and the Attention Message on the display will read, No Signal Service. Contact The Water Saver and provide them the ET Manager serial number and billing information. They will send a wireless command to activate the ET Manager. Once The Water Saver activates the ET Manager, the No Signal Service Attention message will disappear.
