

# Simplified, Yet The Most Advanced in the Industry

## All In a Single, Economic System for Higher Crop Yields and Reduced Costs

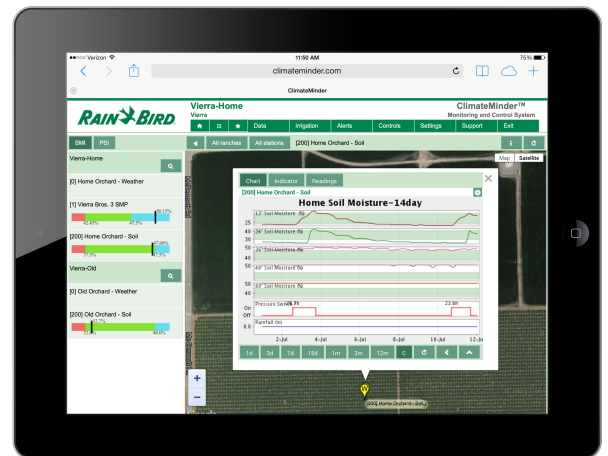

The Rain Bird ClimateMinder™ system is a revolutionary monitoring and control solution for agriculture. Its patented mobile network technology sends key data from the field right to your fingertips – via your mobile phone, computer and/or control systems.

### ClimateMinder™ Lets You

- Monitor your field and crop growing conditions in real-time
- Control your irrigation pump, valves and fertilizer injectors from your phone, computer or tablet
- Get notified immediately when conditions change in the field
- Receive and send daily or weekly reports of your field conditions

### ClimateMinder™ Helps You

- Increase crop yield and quality
- Reduce water, fertilizer and chemical applications costs
- Respond to frost and other climate conditions instantly

Comprehensive Dashboard & Map View

Wireless Cellular & Mesh  
Stations

### SOIL MOISTURE MONITORING

- Multi-sensor Profile Probes
- Water Potential Sensors
- Tensiometers
- EC & Soil Temperature
- Pressure Switch & Transducer

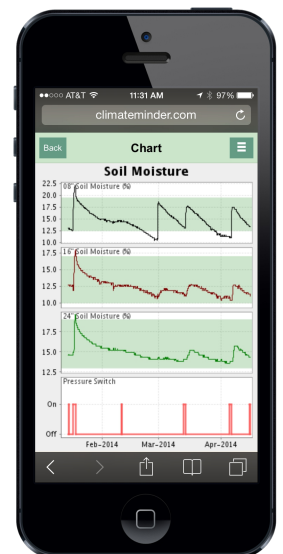

### WEATHER MONITORING

- Temperature & Relative Humidity
- Wind Speed & Direction
- Rainfall
- Solar Radiation & Quantum
- ET
- Growing Degree Days
- Heat & Chill Hours
- Disease Models
- Pest Models
- Leaf Wetness

### PUMP & VALVE CONTROL

### Get Your Information From

- PC or Mac Computer
- iPhone & Android Phones
- iPad & Other Tablets
- No Software to Install
- Partner Platforms such as OnFarm
