

Stream Splitter/Tree Trunk Guard for LF™ Series Sprinkler

The LF Series Sprinkler Stream Splitter accessory easily snaps onto the sprinkler body and splits the water stream to avoid wetting an unwanted area.

- Use to prevent direct water application on tree trunks, equipment, or other general areas which should not be watered
- Compatible with any LF Series model
- Easy field installation, plastic part snaps on to the inside of the sprinkler body's arm
- Blocks approximately 20° of the sprinkler's pattern
- Sold separately from sprinkler in bags of 100 pieces. Item number 118259
