

Cost-Effective, Proactive, and Precise

A New Standard in Water Conservation Made Possible

Flow Sensing—Redefined.

Designed to make water conservation simpler, more affordable, and hassle-free.

The FG100 ensures that advanced flow-sensing technology is accessible to all. Say goodbye to complex installations, special equipment, or constant maintenance. FG100 empowers you to conserve water and protect property with ease.

Save Time and Money

FG100 features simple installation and maintenance that doesn't require additional materials or expenses.

Defend Against Damage

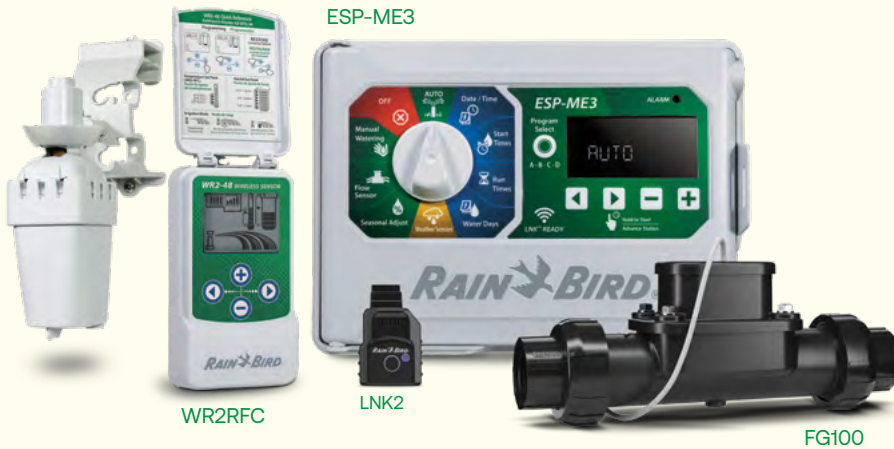

Pinpoint issues fast to conserve water, protect property, fortify landscape, and foster goodwill with your customers.

Best Value in the Industry

Equip homeowners with precise yet cost-effective flow sensing that pays for itself with the prevention of just one leak.

FG100 Flow Sensor

Get the Complete Irrigation Solution

Rain Bird's perfect product pairings make it easy to maintain a beautiful yard and healthy irrigation system season after season.

Say Hello to Convenience

- Precise, industry-leading flow monitoring.
- Compatible with standard K-Factor and Offset controllers.
- Installs with 18-gauge irrigation wire*.
- Threaded and slip configurations available.

35% MORE WATER SAVINGS**

Independent studies confirm flow sensing saves water over the system's lifetime.

* Shielded cable is required in residential installations where electrical interference is likely. Interference may occur when the irrigation controller is installed in close proximity to a main electrical panel, HVAC wiring, or other high-voltage sources.
