Industry Leading Solutions for Residential Drip Zones

Rain Bird® Residential Control Zones feature products optimized for a flow range of .8 l/m to 56.8 l/m. Browse our selection of kits that are perfect for irrigation of residential drip zones.

- Typically lower cost than individual components
- Compact size requires fewer and smaller valve boxes
- Preassembled models provide time savings on installation

Increased Convenience

- Convenient choices of models to meet the needs of residential zones: Low Flow or DV series
- Prepackaged and/or preassembled components - ensures you have what you need and are ready for installation
- Fewer parts and fewer threaded connections mean less chance of leaking / maintenance calls

Long-term Reliability

Rest easy with high-quality
 Rain Bird products tested for
 longstanding performance and
 dependability

Rain Bird Control Zone Kits provide all of the components necessary for on/off control, filtration, and pressure regulation in one single package—making them simple to order and easy to install.

Use the chart below to select the appropriate residential control zone kit for your needs.
