Flow Indicating Basket Filter

All-In-One Flow Measurement, Filtration and Regulation

The Rain Bird® Flow-Indicating Basket Filter is the most complete solution to monitor drip system performance — it's the only product that provides all-in-one flow measurement, filtration and pressure regulation.

All-in-One Protection

Provides flow measurement, filtration and integrated pressure regulation in a compact solution that protects your irrigation system.

Knowledge That Gives You Control

Easy visual monitoring of changes in the irrigation system over time, giving you additional control for troubleshooting and peace of mind.

Easy Maintenance & Installation

The dial provides a visual indication of when filter maintenance is needed and its unique upright basket design provides easy access for maintenance.

Flow Indicating Basket Filter

Proper Flow (Healthy System)

Restricted Flow (Filter Maintenance)

Increased Flow (Potential Leak)

All-in-One Solution

- Flow measurement, filtration (100 micron) and 40 psi (2.8 bar) pressure regulation in one compact solution

- 100% mechanical flow measurement feature provides a cost-effective flow sensing solution for commercial or residential zones

Knowledge That Gives You Control

- Avoid call backs by addressing valve malfunctioning, leaks or clogging before they become a larger issue

- Audit the proper flow right upon install and over time with a quick glance at the dial

Simplifies Maintenance & Installation

- Retro-fit model provides ability to upgrade any Rain Bird basket filter model

- Provides the accurate available flow rate for each zone, simplifying irrigation design and scheduling calculations
