

## Welcome to the Family

*"Our courses are sandy, and when the tubes in our old hydraulic system leaked, we could never find them because they don't leave a wet spot like they do further north. With that system constantly failing, we needed a change. Our new Rain Bird IC system gives us individual head control, allowing us to spot and address any issues quickly — for us, that's huge."*

*Jason Zimmerman, Director of Greens and Grounds, The Nest Golf Club*
