

TBOS

Wireless Battery-Operated Controller Install anywhere. Program from a smartphone.

Easy to Install

- Ideal for commercial applications, including municipal parks, street and highway landscape projects, and construction projects.
- Convenient durable option for providing uninterrupted irrigation while AC-power is not available.
- The TBOS potted latching solenoid will mount on all Rain Bird valves: DV, DVF, ASVF, PGA, PEB, PESB, EFB-CP, BPE and BPES series.
- One Smartphone can program an unlimited number of TBOS Controllers.
- The TBOS solenoid adapters will adapt the potted latching solenoid for use in retrofit applications with selected Irritrol® (Hardie/Richdel) and Buckner® valves or Champion® and Superior® valve actuators.

Easy to Program

- Intuitive programing using the Rain Bird Smartphone app.
- User interface available in these languages: English, French, Spanish, Portuguese, German, Italian, Turkish, Russian, Chinese, Japanese, and Arabic.
- Complete Manual irrigation mode.
- Controller and station names can be customized in App for easier identification.
- TBOS-II Field Transmitter is compatible with TBOS & TBOS Models only. "LT" models are not compatible.

Rain Bird App Features (TBOS)

- Low battery indicator warns of failing batteries in the TBOS Controller.
- 3 local irrigation programs may be saved and restored from App.
- Capability to erase the controller's individual station programs or all programs.
- Capability to review the irrigation program.

TBOS Controller Features

- Basic programming includes 3 independent programs A, B and C, each with 8 start times per day.
- Stations can be assigned to several programs with different watering run times.

- Run time is from 1 minute to 12 hours in minute increments.
- Independent station operation allows sequential start times (with stacking in case of overlap).
- Program-specific and global Monthly Seasonal Adjust; 0% to 300% (1% increment).
- Five watering day cycle modes (Custom, even, odd, odd-31, cyclical) selectable by program for maximum flexibility and watering restriction compliance.
- Rain Delay from 1 to 14 days.
- Master valve output on TBOS 2-, 4-, and 6-station models.
- A TBOS Backup program may be saved and restored (manually or automatically for Contractor Default capability).
- No loss of irrigation program after a battery replacement.

TBOS System Components

Rain Bird App

- Available for Android and iOS devices.

TBOS Controllers

- Available in 4 models: 1, 2, 4, or 6 stations.
- Operates one valve per station.
- Direct Rain Sensor Connection accommodates the Rain Bird RSD-BEx Rain Sensor.
- Operates with one 9V alkaline battery (Energizer and Duracell are recommended) type 6AM6 (international standard) or 6LR61 (European standard): battery not included.
- Battery life is one year with a high-quality 9V alkaline battery.
- Resists humid and harsh environments.
- Rated IP68: 100% waterproof and fully submersible.
- Master Valve/Pump output on on TBOS 2-, 4-, and 6-station models.
- Dimensions: Width: 3.8" (9,5 cm)
Height: 5.1" (13,0 cm)
Depth: 2" (5,3 cm)
- Weight: 17.64 ounces (500g)
- Maximum wire run between the controller and solenoid: 30m by using 1.5mm² (16 AWG) extended wire.

TBOS System Accessories

TBOS Potted Latching Solenoid

- Two 0.75 mm² wires (18 gauge) are supplied: 60 cm long (23.6 inches)
- Plastic adapter included for Rain Bird valves: DV, DVF, ASVF, PGA, PEB, PESB, EFB-CP, BPE and BPES series.
- 10 bars (150 psi) maximum operating pressure.

Certifications

- cULus, FCC Part 15b, ISED RSS-247 Issue 2.0, CE, IP68, ICASA, CITC, ACMA, SUBTEL, SRRRC, MIC, IFETEL, CRA, TRA. For current certifications visit: www.rainbird.com/tbos

TBOS Solenoid Adapters

- Easy to install.
- Black adapter for plastic valves allows the TBOS potted latching solenoid to be used with selected Irritrol (Hardie/Richel) and Buckner valves.
- Brown adapter for brass valves allows the TBOS potted latching solenoid to be used with selected Champion and Superior valve actuators.

RSD-BEx Rain Shutoff Device

- Operates with 24V or 9V controllers, including TBOS, TBOS-II and TBOS.
- Designed to save water by automatically measuring precipitation and keeping irrigation systems from watering in rainy conditions.
- Does not interrupt irrigation taking place, but subsequent program starts will be prevented.
- Automatic return to normal watering schedule when the moisture level decreases as a result of natural evaporation.

Specifications

TBOS Controller

The irrigation controller shall be programmable from the Rain Bird Smartphone App.

The programs and manual operations shall be communicated to the controller from a Smartphone.

The controller shall be of a module type which may be installed in a valve box underground.

The controller shall be housed in an ABS plastic cabinet and shall be potted to insure waterproof operation. Their battery compartment shall be dual-sealed to prevent water from entering the compartment. The controller shall have two mounting slots for

screws allowing the controller to be securely mounted inside a valve box. The controller shall be designed to accommodate one 9V alkaline battery (EN22- 6L561-6AM6-9V) for one full year regardless of the number of stations utilized.

The controller shall operate ____ (1, 2, 4 or 6) stations.

One sensor input shall be present on the controller and shall accommodate dry contact rain sensor.

____ -station (2-, 4-, or 6-) models shall be able to support a Master valve.

All valves shall affect the Master Valve /Pump.

The controller shall have station run time capability from one minute to twelve hours in one minute increments, a 365-day calendar with leap year and three programs A, B,C with eight start times each. One valve can be assigned to none, one, any or all programs.

Each program shall be capable of being set to any of the following: custom cycle (days of the week), cyclic (1 to x days variable), odd days, odd days-31 and even days.

The controller shall have a program level and global Monthly Seasonal Adjust; 0% to 300% (1% increment).

A Rain Delay shall allow the user to suspend irrigation programs from 1 to 14 days.

The controller shall be capable of starting/stopping a manual single valve or manual program, cancel irrigation in progress or launch a test valve from Rain Bird App.

Each valve not activated during the last 24 hours shall be automatically activated during 1 second each day for an anti-calcium effect.

TBOS Potted Latching Solenoid

Controller station output shall drive one

single potted latching solenoid that shall fit onto any Rain Bird Valves: DV, DVF, ASVF, PGA, PEB, PESB, EFB-CP, or BPE or BPES series valve.

The controller and Potted Latching Solenoid shall be as manufactured by Rain Bird Corporation, Glendora, California, USA.

TBOS Rain Shutoff Device

The Rain Shutoff Device shall function correctly only when buried under 2" (5 cm) of sand. The device shall be pre-set and nonadjustable.

The device shall function with a DC system only. The device shall have a bypass switch.

The Rain Shutoff Device shall be as manufactured by Rain Bird Corporation, Glendora, California, USA.
